CORE SKILLS

AI Product Management | Product Strategy | User Onboarding & Activation | User Research | Prompt Engineering | Documentation Strategy | KPI Definition | Agile Delivery | AI-Assisted Prototyping | Project Management | Product Analytics | Activation Strategy | UX Strategy | Project Management

PROFESSIONAL EXPERIENCE

Microsoft - Program Manager 2

June 2021 - Jan 2026

- Led the Azure AI Studio homepage redesign for 137K+ monthly new visitors, addressing discoverability gaps after identifying that only 28.98% of users returned after the first 7 days.
- Improved Azure AI Studio onboarding by launching a Getting Started Learn tab used by 59.9% of homepage visitors after launch, reducing friction for new and existing AI developers.
- Led the redesign and General Availability launch of the Azure Machine Learning landing page, scaling adoption to 92,784 users with only 179 users reverting within 180 days of launch.
- Redesigned Azure AI Foundry resource setup in Azure Portal, consolidating a 12-step multi-resource process into a single creation flow.
- Simplified Azure AI Foundry project creation by reducing required default setup fields from 7 to 1, improving onboarding clarity for enterprise users, IT admins, and AI developers.
- Improved Azure AI Studio documentation quality by updating 35.96% of key Learn documentation after identifying that 35% of documentation feedback cited outdated or unclear content.
- Launched the Azure AI Studio billing dashboard after user research found 30% of users struggled to obtain cost information and another 30% found project costs unclear.
- Led strategy, design, and delivery of Azure AI Foundry Notification Center, consolidating policy and governance alerts from multiple Azure portals into a one-click in-product notification experience.

PERSONAL PROJECTS

UwriteConsulting.com - AI Career Readiness Web App | Product Manager & Builder

- Designed, built, and launched an AI-powered career readiness web app end-to-end, owning product strategy, UX flow, AI prompt structure, Stripe checkout integration, and deployment to help users turn everyday experiences into resume bullets, interview stories, LinkedIn summaries, and personal branding content.

KeneishaWiggan.com - Professional Portfolio | Product Manager & Builder

- Designed, built, and launched an AI-assisted personal portfolio website using ChatGPT, Visual Studio Code, GitHub, and Hostinger to showcase product strategy, blogs, and project work through a recruiter-focused user journey.
