PROFESSIONAL SUMMARY

Product Manager with enterprise B2B SaaS UX experience across Azure AI products, complex setup flows, onboarding, billing, documentation, and notifications. Skilled at translating research, usage data, feedback, and AI-assisted prototyping into scalable experiences for enterprise users.

CORE SKILLS

Enterprise B2B SaaS UX | Product Design Strategy | User-Centered Design | UX Research Synthesis | Information Architecture | User Flows | Wireframing | AI Prototyping | Product Discovery | Prompt Engineering | Program Management | Project Management | Cross-Functional Leadership | Stakeholder Management | KPI Tracking

PROFESSIONAL EXPERIENCE

Microsoft - Program Manager 2

June 2021 - Jan 2026

- Led the Azure AI Studio homepage redesign for 137K+ monthly new visitors, using product usage data to identify discoverability gaps after only 28.98% of users returned after the first 7 days.
- Improved Azure AI Studio onboarding by launching a Getting Started Learn experience used by 59.9% of homepage visitors after launch, reducing friction for new and existing AI developers.
- Led the redesign and General Availability launch of the Azure Machine Learning landing page, scaling adoption to 92,784 users with only 179 users reverting within 180 days of launch.
- Redesigned Microsoft AI Foundry resource setup in Azure Portal, consolidating a 12-step multi-resource process into one guided creation flow for enterprise users, IT admins, and AI developers.
- Redesigned Microsoft AI Foundry project creation by reducing required default setup fields from 7 to 1, improving onboarding clarity and usability in a complex enterprise workflow.
- Launched the Azure AI Studio billing dashboard after user research found 30% of users struggled to obtain cost information and another 30% found project costs unclear.
- Led strategy, design alignment, and delivery of Microsoft AI Foundry Notification Center, consolidating policy and governance alerts from multiple Azure portals into a one-click in-product experience.
- Improved Azure AI Studio documentation quality by updating 35.96% of key Learn documentation after identifying that 35% of documentation feedback cited outdated or unclear content.

Cyborg Mobile LLC - Junior Consultant, Product Mgmt.

Sep 2020 - Mar 2021

- Led product discovery, competitive research, user research, and requirements gathering for two web redesign projects managed through Cyborg Mobile LLC: CyborgMobile.com and NewTechnologists.com, improving product offering discoverability, navigation clarity, and overall user experience.
- Translated insights into technical specifications, prioritized backlog items, and user stories while partnering with engineers and stakeholders to move both products from concept to launch.
- Managed agile delivery in Jira by supporting sprint planning, backlog grooming, testing feedback, and release coordination to improve product quality and launch readiness.

PERSONAL PROJECTS

UwriteConsulting.com - AI Career Readiness Web App | Product Manager & AI Developer

- Designed, built, and launched an AI-powered career readiness web app, owning product strategy, UX flow, AI prompt structure, Stripe checkout, and deployment to help users turn experience into career materials.

KeneishaWiggan.com - Professional Portfolio | Product Manager & AI Developer

- Designed, built, and launched an AI-assisted portfolio website using ChatGPT, Visual Studio Code, GitHub, and Hostinger to showcase product strategy, blogs, and project work.
